

Usage note: These should be able to sit end-to-end in either direction without touching

Tolerances	
Angle	+- 1°
Dimensions	+- 0.05mm
Material Thickness	+- 0.05mm

Material	
Phosphor Bronze	
Spring Temper	
Plating not necessary	
0.15 mm Thickness	
Surface Finish not important	As long as it's electrically conductive and solderable

Other Notes
The place where the metal fingers meet at the to should have a little bit of tension toward each other. They're electrical contacts for a breadboard, so wire in the range of 0.3mm-1mm should be able to slide in smoothly and make good electrical contact consistently.
Bends can be increased to provide more tension if the contacts at the top don't squeeze together
All other dimensions should be the same as the most recent spring clip order
